Sustainability Measurement: Inclusive Wealth and Well-being

Chair: Prof. Scott Valentine (Research Promotion Director of Q-AOS)

Urban development is progressing using the new economic indicator "New National Wealth Index," which indicates the affluence of countries and regions. The "New National Wealth Index" is a new economic indicator that converts how much "capital" that leads to the sustainable economic development is in a country or region, including education, health, and nature. This seminar introduces examples from all over the world, each country, each region, and companies.

"Inclusive Wealth and Well-being"

"ESG"

Key Words

"Sustainable communities"

Professor Shunsuke Manaki, PhD
Kyushu University Faculty of Engineering

Shunsuke Managi is the Distinguished Professor of Technology and Policy & Director of Urban Institute at the Kyushu University, Japan. He has been awarded several national research grants on topics such as urbanization, transportation, energy, climate change, sustainability, and population change.
