# Taste and health

Chair: **Assoc. Prof. Fumihiko YOKOTA** (Research Promotion Coordinator of Q-AOS)**Key Words**

Taste

Taste receptor

Taste disorder

Hypertension

Obesity

Diabetes

Professor **Noriatsu Shigemura**

Department of Dental Science, Faculty of Dental Science

Hyogo Prefecture, 1996: Kyushu University, School of dentistry, 2000: Kyushu University, Graduate School of dentistry, Ph.D. (Dentistry), 2000: Postdoctoral fellow, Bio-oriented technology research advancement institution (BRAIN), 2001: Assistant professor, Kyushu University, graduate school of dental science, 2008: Associate professor, Kyushu University, graduate school of dental science, 2016: Professor, Kyushu University, graduate school of dental science

Research on taste perception and transmission is developing dynamically in line with recent developments in molecular biology, and many mysteries on taste are rapidly being unraveled. In this presentation, I will outline the general characteristics of taste (molecular mechanisms of the reception and transmission) and its physiological role, and also present the causes of "taste disorders" affecting the quality of life and disrupt the nutritional balance along with our research to date.
